DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over <u>Wildfeuer</u> (6298055) in view of applicant's admitted prior art.

As per claims 1,7,14,19,20, Wildfeuer (6298055) teaches:

"transmitting audio over a network......audio packets are stored in a jitter buffer......jitter buffer latency......modified during periods of quasi-silence....types of audio, non-speech audio or speech audio comprising" as voice encoding/decoding over a data network minimizing latency times by detecting speech or non-speech (col. 2 lines 7-22 and lines 43-58)

"a non-speech detection module....audio" as detecting a real or false dtmf (col. 6 lines 15-32)

"an add header.....data packet" as data packets (Fig. 4) with headers (col. 3 lines 57-67)

Application/Control Number: 09/484,159

Art Unit: 2655

"a remove header routine.....enabled" as removing fixed delay's and changing the delay based on a voice/speech determination or a dtmf determination (col. 4 lines 40-55)

Wildfeuer (6298055) does not explicitly teach the non-speech identifier being stored in the header of the data packet, however, applicant's admitted prior art teaching a non-speech identifier being stored in the header (see applicant's Fig. 3, RTP section).

Therefore, it would have been obvious to one of ordinary skill in the art of data structures to modify the teachings of Wildfeuer (6298055) with non-speech identifier storage in a header because it would allow for quicker access to the actual data, in addition to having additional but separate information available regarding the actual data.

As per claims 2,8,15, Wildfeuer (6298055) teaches one bit notification (figs. 5 and 6)

As per claims 3,9,16, Wildfeuer (6298055) teaches RTP (col. 8 lines 19-25)

As per claims 4&5,10,11,17,18, Wildfeuer (6298055) teaches identifying states based on speech or dtmf detection (col. 6 line 50 – col. 7 line 29)

As per claims 6,12,13, <u>Wildfeuer (6298055)</u> teaches buffer latency disablement (col. 2 lines 44-50)

Application/Control Number: 09/484,159

Art Unit: 2655

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mori (6160633) teaches a data packet with a header to store non-speech information (col. 13 lines 25-45).

4. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D.C. 20231

or faxed to:

(703) 872 9314,

(for informal or draft communications, please label "PROPOSED" or "DRAFT") Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Opsasnick, telephone number (703)305-4089, who is available Tuesday-Thursday, 9AM-4PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ms. Doris To, can be reached at (703)305-4827. The facsimile phone number for this group is (703)872-9314.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group 2600 receptionist whose telephone number is (703) 305-4750, the 2600 Customer Service telephone number is (703) 306-0377.
